

GYTS Objectives

The Global Youth Tobacco Survey (GYTS), a component of the Global Tobacco Surveillance System (GTSS), is a global standard for systematically monitoring youth tobacco use and tracking key tobacco control indicators.

GYTS is a cross-sectional, school-based survey of students in grades associated with ages 13 to 15 years. GYTS uses a standard core questionnaire, sample design, and data collection protocol. It assists sites in fulfilling their obligations under the World Health Organization (WHO) Framework Convention on Tobacco Control (FCTC) to generate comparable data within and across sites. WHO has developed MPOWER, a technical package of selected demand reduction measures contained in the WHO FCTC:

Monitor tobacco use & prevention policies
Protect people from tobacco smoke
Offer help to quit tobacco use
Warn about the dangers of tobacco
Enforce bans on tobacco advertising, promotion, & sponsorship
Raise taxes on tobacco

GYTS Methodology

GYTS uses a global standardized methodology that includes a two-stage sample design with schools selected with a probability proportional to enrollment size. The classes within selected schools are chosen randomly and all students in selected classes are eligible to participate in the survey. The survey uses a standard core questionnaire with a set of optional questions that countries can adapt to measure and track key tobacco control indicators. The questionnaire covers the following topics: tobacco use (smoking and smokeless), cessation, secondhand smoke (SHS), pro- and anti-tobacco advertising and promotion, access to and availability of tobacco products, and knowledge and attitudes regarding tobacco use. The questionnaire is self-administered; using scannable paper-based bubble sheets, it is anonymous to ensure confidentiality.

The United Nations Relief and Works Agency (UNRWA) is a relief and human development agency that provides education, healthcare, social services, and emergency aid to Palestine refugees across five fields in Gaza Strip, the West Bank, Lebanon, Jordan, and Syria. In the West Bank GYTS was conducted in 2022 by UNRWA, under the coordination of the Health Department. The overall response rate was 88.1%. A total of 2,414 eligible students in grades 7-10 completed the survey, of which 1,741 were aged 13-15 years. Data are reported for students aged 13-15 years.

GYTS Highlights

TOBACCO USE

- 34.7% of students, 45.2% of boys, and 26.9% of girls currently used any tobacco products.
- 33.0% of students, 44.8% of boys, and 24.5% of girls currently smoked tobacco.
- 17.6% of students, 30.5% of boys, and 8.8% of girls currently smoked cigarettes.
- 6.2% of students, 8.2% of boys, and 4.9% of girls currently used smokeless tobacco.

ELECTRONIC CIGARETTES

- 22.5% of students, 29.3% of boys, and 17.6% of girls currently used electronic cigarettes.

CESSATION

- Almost 6 in 10 (57.7%) students who currently smoked tobacco tried to stop smoking in the past 12 months.
- Almost 6 in 10 (55.0%) students who currently smoked tobacco wanted to stop smoking now.

SECONDHAND SMOKE

- 42.5% of students were exposed to tobacco smoke at home.
- 42.9% of students were exposed to tobacco smoke inside enclosed public places.

ACCESS & AVAILABILITY

- 64.2% of students who currently smoked cigarettes bought cigarettes from store, shop, street vendor, or kiosk.
- Among students who currently smoked cigarettes who tried to buy cigarettes, 65.5% were not prevented from buying them because of their age.

ADVERTISING & PROMOTION

- Almost 4 in 10 (38.5%) students noticed anti-tobacco messages in the media.
- More than 4 in 10 (44.6%) students noticed tobacco advertisements or promotions when visiting points of sale.
- Almost 2 in 10 (15.3%) students had something with a tobacco brand logo on it.

KNOWLEDGE & ATTITUDES

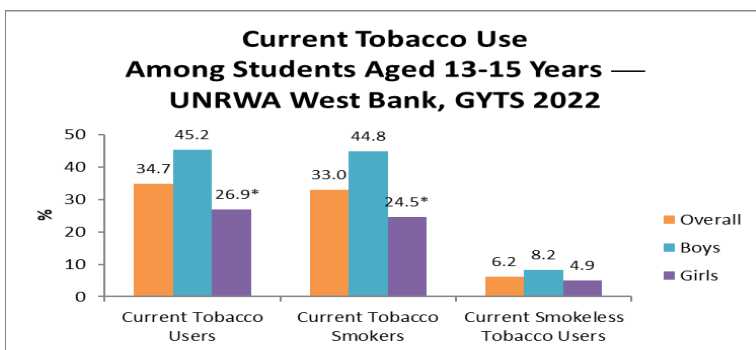

- 62.6% of students definitely thought other people's tobacco smoking is harmful to them.
- 74.8% of students favored prohibiting smoking inside enclosed public places.
