# **GYTS Objectives**

The Global Youth Tobacco Survey (GYTS), a component of the Global Tobacco Surveillance System (GTSS), is a global standard for systematically monitoring youth tobacco use and tracking key tobacco control indicators.

GYTS is a cross-sectional, nationally representative school-based survey of students in grades associated with ages 13 to 15 years. GYTS uses a standard core questionnaire, sample design, and data collection protocol. It assists countries in fulfilling their obligations under the World Health Organization (WHO) Framework Convention on Tobacco Control (FCTC) to generate comparable data within and across countries. WHO has developed MPOWER, a technical package of selected demand reduction measures contained in the WHO FCTC:

Monitor tobacco use & prevention policies

Protect people from tobacco smoke

Offer help to quit tobacco use

Warn about the dangers of tobacco

Enforce bans on tobacco advertising, promotion, & sponsorship

Raise taxes on tobacco

# **GYTS Methodology**

GYTS uses a global standardized methodology that includes a two-stage sample design with schools selected with a probability proportional to enrollment size. The classes within selected schools are chosen randomly and all students in selected classes are eligible to participate in the survey. The survey uses a standard core questionnaire with a set of optional questions that countries can adapt to measure and track key tobacco control indicators. The questionnaire covers the following topics: tobacco use (smoking and smokeless), cessation, secondhand smoke (SHS), pro- and anti-tobacco advertising and promotion, access to and availability of tobacco products, and knowledge and attitudes regarding tobacco use. GYTS is an anonymous and voluntary survey. The survey questionnaire is self-administered on a secure web-based platform, and students access it using an electronic device (e.g., laptop, tablet, or mobile phone).

In Bulgaria, GYTS was conducted in 2023 by National Center of Public Health and Analyses. The overall response rate was 79.5%. A total of 4,074 eligible students in grade 7-9 completed the survey, of which 3,378 were aged 13-15 years. Data are reported for students aged 13-15 years.

### **TOBACCO USE**

- 26.6% of students, 20.4% of boys, and 33.0% of girls currently used any tobacco products (includes heated tobacco products).
- 23.6% of students, 18.5% of boys, and 28.9% of girls currently smoked tobacco.
- 19.8% of students, 14.5% of boys, and 25.2% of girls currently smoked cigarettes.
- 20.5% of students, 14.2% of boys, and 26.2% of girls currently used heated tobacco products.
- 2.9% of students, 3.2% of boys, and 2.5% of girls currently used smokeless tobacco.

#### **ELECTRONIC CIGARETTES**

• 23.3% of students, 19.3% of boys, and 27.2% of girls currently used electronic cigarettes.

#### ORAL NICOTINE PRODUCTS

• 10.7% of students, 12.0% of boys, and 9.6% of girls currently used nicotine pouches.

#### **CESSATION**

- Almost 6 in 10 (56.9%) students who currently smoked tobacco tried to stop smoking in the past 12 months.
- More than 4 in 10 (40.6%) students who currently smoked tobacco wanted to stop smoking now.

#### SECONDHAND SMOKE

- 54.7% of students were exposed to tobacco smoke at home.
- 62.7% of students were exposed to tobacco smoke inside enclosed public places.

#### **ACCESS & AVAILABILITY**

- 46.2% of students who currently smoked cigarettes bought cigarettes from a store, supermarket, pub, restaurant, pavilion, or kiosk.
- Among students who currently smoked cigarettes who tried to buy cigarettes, 63.7% were not prevented from buying them because of their age.

## **ADVERTISING & PROMOTION**

- More than 3 in 10 (32.3%) students noticed anti-tobacco messages in the media.
- Almost 6 in 10 (57.1%) students noticed tobacco advertisements or promotions when visiting points of sale.
- More than 1 in 10 (11.7%) students had something with a tobacco brand logo on it.

#### **KNOWLEDGE & ATTITUDES**

- 34.9% of students definitely thought other people's tobacco smoking is harmful to them.
- 78.7% of students favored prohibiting smoking inside enclosed public places.

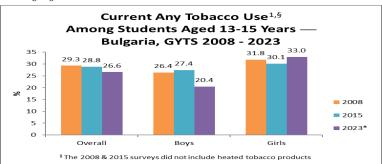

TOBACCO USE			
ANY TOBACCO USE (smoked, heated, and/or smokeless)	OVERALL (%)	BOYS (%)	GIRLS (%)
