Summary

The Global Adult Tobacco Survey (GATS), a component of Global Tobacco Surveillance System (GTSS), is a global standard for systematically monitoring adult tobacco use and tracking key tobacco control indicators. GATS is a nationally representative household survey of adults 15 years of age or older using a standard core questionnaire, sample design, and data collection and management procedures that were reviewed and approved by international experts. GATS is intended to enhance the capacity of countries to design, implement and evaluate tobacco control interventions.

GATS is designed to produce national and sub-national estimates among adults across countries. The target population includes all non-institutionalized men and women 15 years of age or older who consider the country to be their usual place of residence. All members of the target population are sampled from the household that is their usual place of residence. All GATS countries use country-specific stratified multi-stage cluster sampling designs and an interview consisting of a household screening component and an individual component administered to the selected respondent. Data is collected using electronic handheld devices.

GATS Turkey was conducted in 2008 using a three-stage stratified cluster sample design. The initial sample size was 11,200 with 9,030 completed interviews. The GATS Turkey questionnaire includes core questions about background characteristics, tobacco smoking, cessation, secondhand smoke, economics, media, and knowledge, attitudes and perceptions, and country-specific questions. Questions were adapted in each section, then reviewed and approved by the GATS questionnaire expert review committee. The questionnaire was administered in Turkish using the General Survey System (GSS) software program developed by RTI for electronic data collection using handhelds.

The data file does not contain personal identifying information to ensure and protect confidentiality. Due to the complex sample design, clustering, stratification and sample weights should be taken into account in the data analysis in order to obtain proper point estimates and variances. The stratification, cluster and sample weight variables are `gatsstrata`, `gatscluster` and `gatsweight`, respectively. To access the GATS Turkey fact sheet and country report, please visit: www.cdc.gov/tobacco/global/gats/countries.

Household Questionnaire

HH1

Type = Numeric

First, I'd like to ask you a few questions about your household. In total, how many persons live in this household?

Summary

Minimum.....	1
Maximum.....	33
Valid case.....	9,030
Blank (Missing/Not applicable).....	0

HH2

Type = Numeric

How many of these household members are 15 years of age or older?

Summary

Minimum.....	1
Maximum.....	19
Valid case.....	9,030
Blank (Missing/Not applicable).....	0

HH3

Type = Numeric

How many household members are 15 years of age or older?

Summary

Minimum.....	1
Maximum.....	8
Valid case.....	9,030
Blank (Missing/Not applicable).....	0

HH4B

Type = Numeric

What is the selected person's age?

Summary

Minimum.....	15
Maximum.....	100
Valid case.....	9,030
Blank (Missing/Not applicable).....	0

HH4B_1 – HH4B_8

Type = Numeric

What is this person's age?

HH4C

Type = Numeric

What is the month of the selected person's date of birth?

<u>Value</u>	<u>Label</u>	<u>Frequency</u>	<u>Unweighted Percent</u>	<u>Weighted Percent</u>
1	January	26	9.6	9.2
2	February	25	9.2	8.0
