

Venezuela - Lara State (Ages 13-15) Global Youth Tobacco Survey (GYTS) FACT SHEET

The Venezuela - Lara State GYTS includes data on prevalence of cigarette and other tobacco use as well as information on five determinants of tobacco use: access/availability and price, exposure to secondhand smoke (SHS), cessation, media and advertising, and school curriculum. These determinants are components Venezuela - Lara State could include in a comprehensive tobacco control program.

The Venezuela - Lara State GYTS was a school-based survey of students in 6to, 7mo, 8vo, and 9no grado conducted

in 2008. A two-stage cluster sample design was used to produce representative data for Venezuela - Lara State. At the first stage, schools were selected with probability proportional to enrollment size. At the second stage, classes were randomly selected and all students in selected classes were eligible to participate. The school response rate was 72.0%, the class response rate was 75.5%, the student response rate was 81.7%, and the overall response rate was 44.2%. A total of 646 students aged 13-15 participated in the Venezuela - Lara State GYTS.

Prevalence

- 20.4% of students had ever smoked cigarettes (Boy = 20.1%, Girl = 19.9%)
- 12.4% currently use any tobacco product (Boy = 13.8%, Girl = 11.0%)
- 9.2% currently smoke cigarettes (Boy = 9.3%, Girl = 9.3%)
- 4.7% currently use other tobacco products (Boy = 7.0%, Girl = 2.3%)
- 13.3% of never smokers are likely to initiate smoking next year

Knowledge and Attitudes
